PROFESSIONAL SUMMARY

Performance-driven Senior Software Engineer and Technical Lead with over 6 years of professional experience engineering, scaling, and deploying enterprise distributed systems and SaaS platforms. Deep expertise in backend system design using .NET 8, C#, ASP.NET MVC, and Object-Oriented Programming (OOP) patterns like SOLID and Clean Architecture. Adept at optimizing MS SQL Server databases, integrating REST and WCF/SOAP web services, and driving CI/CD automation through Azure DevOps in Agile/Scrum environments.

WORK EXPERIENCE

BMW Group Malaysia | Kuala Lumpur, Malaysia

August 2025 - Present

Senior Software Engineer

- System Ownership & Scaling:** Architect and develop high-performance .NET Core backend services and maintainable RESTful APIs for global BMW Financial Services digital platforms.
- Enterprise Architecture:** Enforce Clean Architecture, Rich Domain-Driven Design (DDD), and SOLID principles handling complex multi-tenant automotive financial workflows.
- Database Engineering:** Design and optimize MS SQL Server workflows and stored procedures, applying SQL performance tuning to eliminate transaction bottlenecks.
- Production Support & Quality:** Lead root-cause analysis and resolve complex multi-tiered production issues across API gateways, application servers, and persistence layers.
- Cross-Functional Collaboration:** Participate in the full software development lifecycle within Agile/Scrum methodologies, leveraging Azure DevOps for continuous CI/CD deployments.

Sweya.AI | India (Remote)

August 2022 - July 2025

Technical Lead & Senior Fullstack Engineer

- Product Delivery:** Led the full-stack architecture and zero-to-production delivery of a mission-critical healthcare enterprise platform using .NET 8, C#, and JavaScript (Angular 17).
- Microservices & Security:** Designed decoupled microservices; implemented enterprise-grade OAuth2/OIDC authentication and custom Casbin RBAC policies.
- Real-Time Orchestration:** Built low-latency event notification engines utilizing SignalR WebSockets and Hangfire for background job pipelines, boosting database throughput.
- DevOps Excellence:** Engineered containerized target pipelines using Docker, Kubernetes, and continuous integration (CI) tools to ensure high availability.
- Mentorship & Technical Direction:** Guided a remote agile engineering squad, establishing Clean Code standards and conducting rigorous code reviews and unit testing (xUnit/Jest).

Brain Station 23 | Dhaka, Bangladesh

November 2021 - July 2022

Associate Software Engineer

- High-Traffic E-Commerce:** Optimized consumer-facing ASP.NET MVC web storefronts on the nopCommerce platform, serving over 100,000 weekly active visitors.
- Scalable API Design:** Engineered highly optimized RESTful APIs and web services capable of sustaining load spikes up to 10,000 concurrent visitors.
- Third-Party Integration:** Integrated third-party logistics and marketing platforms, completing technical syncs with dropshipping APIs and Facebook Shop APIs.
- Performance Engineering:** Drastically reduced page-load latency by deploying Redis caching strategies and leveraging AWS auto-scaling infrastructure.
- Credential Milestone:** Maintained strict adherence to coding standards, earning a 98% score on the official nopCommerce Certified Developer exam within 3 months.

Associate Software Engineer

- **Monolith Modernization:** Successfully transitioned a critical, 15+ year-old monolithic core banking application into a modern .NET Core microservices architecture, yielding a 40% performance improvement.
- **Full-Stack Development:** Developed 60+ SPA views and authored over 100 high-performance REST APIs and WCF/SOAP web service integrations backed by Oracle DB.
- **AI-Powered Solutions:** Co-developed and deployed digital eKYC and onboarding platforms for prominent banking clients, integrating biometric match workflows and OCR parsing engines.
- **Distributed Messaging:** Embedded RabbitMQ message brokers for robust event-driven background processing and Ocelot API Gateways for secure cross-service routing.
- **Corporate Recognition:** Formally awarded "A Significant Contributor" by executive leadership for outstanding delivery and continuous adaptation of innovative banking solutions.

PROJECTS

Clappit - AI-Powered Cloud Infrastructure SaaS Founding Engineer

Established enterprise technical direction. Formulated a modular Nx monorepo mapping multi-tenant workflows. Deployed automated GitOps delivery pipelines (ArgoCD, Kubernetes) and integrated Kafka event-driven streaming.
.NET Core, Angular, Docker, Kubernetes, Kafka, PostgreSQL, Azure APIs

GSK Expense & Order Management Systems Backend Architecture

Architected an enterprise expense validation ecosystem utilizing strict Domain-Driven Design and CQRS. Engineered granular feature-level security and real-time processing notifications via SignalR.
.NET 8, ASP.NET Core, DDD, MediatR, SignalR, OpenTelemetry

EDUCATION

Bachelor of Science in Computer Science Graduated
American International University-Bangladesh (AIUB)
GPA: 3.58 / 4.00. Focus: Object-Oriented Programming (OOP), Data Structures & Algorithms.

CERTIFICATIONS

Certified nopCommerce .NET Developer (Score: 98%) nopCommerce Association

SKILLS

Backend & Frameworks: .NET 8, .NET Framework, ASP.NET MVC, C#, REST, WCF/SOAP APIs
Architecture & Testing: OOP, SOLID, Clean Code, Clean Architecture, DDD, Unit Testing, Code Reviews
Databases: MS SQL Server (Performance Tuning), PostgreSQL, Oracle DB, Entity Framework
DevOps & Methodologies: Azure DevOps, CI/CD, Agile, Scrum, Docker, Kubernetes
Frontend: JavaScript, TypeScript, Angular 14-18, HTML/CSS
